stability matters.

If there is one thing to learn from the recent financial turmoil, knowing who to trust is paramount.

Medical Protective, a proud member of Warren Buffett's Berkshire Hathaway, has always believed that to provide our healthcare providers the best defense in the nation, our financial stability needs to be *rock-solid*, stronger than any other company.

Stability even in the worst of times.

Medical Protective is the only medical professional liability insurance company to protect their healthcare providers through all the business and economic cycles of the last 110 years, including the tough economic times of *the Great Depression*. We are also proud to have provided unmatched defense and stability during all the medmal crises.

> We have received higher ratings from A.M. Best and S&P than any other carrier in the healthcare liability industry.

Trust Stability. Trust Medical Protective.

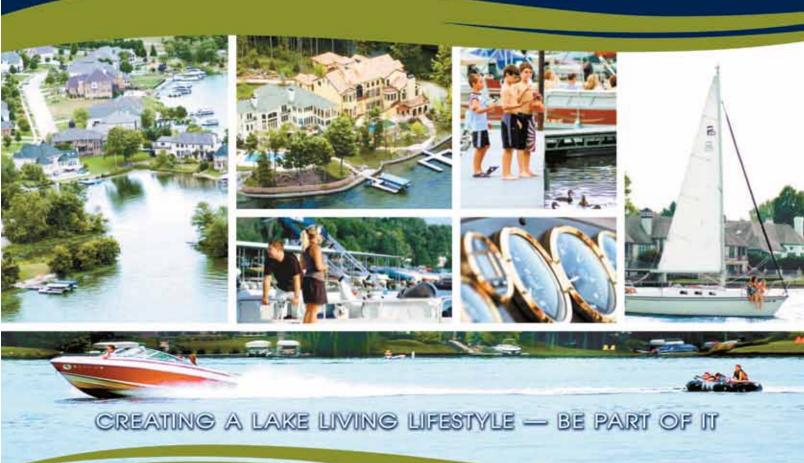

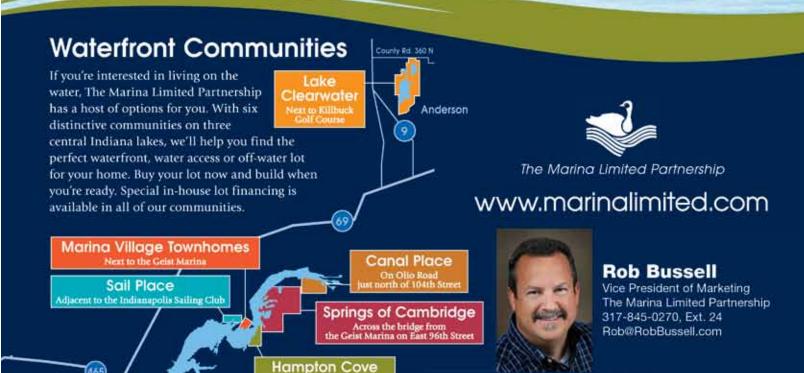

Contact Bart Lyon today for a medmal insurance check-up and a FREE Indiana medmal expert guide.

Specializing in the Diagnosis & Treatment of Back and Spinal Pain!

Steven Levine, MD

William Hall, MD

Markus Niederwanger, MD

Types of Pain Treated

- Acute & Chronic Back Pain
- Cervical Spine (Neck) Pain & Related Headaches
- Herniated Discs
- Degenerative Disc Disease
- Sciatica / Radiculopathy
- Spinal Facet Syndrome
- Spinal Stenosis (Lumbar & Cervical)
- Spondylosis (Spinal Arthritis)
- Work & Sports Related Injuries

Available Treatments

- Fluoroscopic Epidural Steroid Injections (Cervical, Thoracic & Lumbar)
 - **Nerve Blocks** (Diagnostic and Therapeutic)
 - Sympathetic Nerve Blocks
 - Fluoroscopic Selective Nerve Blocks
- **Facet Joint Injections**
- Sacroilliac Joint Injections
- Radiofrequency Procedures
 - Facet Denervation
- Rhizotomy
- Sympathectomy
- Nucleoplasty
- Neuroplasty
- Discography
- Selective Endoscopic Discectomy (SED)
- IntraDiscal ElectroThermal Annuloplasty (IDET)
- Spinal Cord Stimulation

President's Page Jeffrey J. Kellams, MD

Bullying Is Abuse!

Bullying is abuse! It involves repeated acts over time to enforce one's power over another person or group. To some extent this President's Page Commentary is a sequel to comments made in the last Bulletin where reference was made to the Columbine High School tragedy where two students who had been bullied for years by other students retaliated by killing 13 people, wounding 24 others, and then suicided. A study of 37 school shootings after that event found that bullying played a major role in two-thirds of events such as that. Between 60-80% of students are bullied in school and the bullied frequently become the bullies. In another study 432 gifted students were studied regarding bullying and more than two-thirds of these academically gifted students acknowledged being bullied ... and nearly one-third of these had entertained violent thoughts in reaction to this. Bullying can also take on larger perspectives involving even more than mere individuals. Bullying can occur between religious groups, neighborhoods, various bodies of people, and entire nations. In fact, at an international level imbalances of power between countries both economic and ideological can involve bullying in concept and result in war. Both World Wars I and II are classic examples. Hitler himself was bullied as a child. More recently, events in Libya illustrate the bullying techniques of a sociopathic ill directed leader attempting to intimidate and control vulnerable populations.

In our everyday life, however, we tend to associate bullying with a school or workplace situation in which an individual bullies directly or indirectly. This is probably due to the fact that most of us have been bullied or can recall witnessing bullying at some point in our own lives. Many of us remember the students in our own school classes who wore the thick glasses, were slow to read, were physically uncoordinated in gym class, and always the last one to be picked for the kickball team. Insensitive comments were made many times to simply make us part of the "in" group. Little did we realize in our youthful ignorance the negative impact we were making on others less fortunate. Two major categories of bullying occur. Direct bullying involves physical aggression of varying degrees including punching, hitting, slapping, physical fights, etc. Indirect bullying is more subtle and includes social isolation of the victim, criticism of dress, ridicule of the victim's religion, race, disability, etc. Use of "the silent treatment," false rumors, staring, and laughing at the victim are other common bullying techniques. Many times we inadvertently encourage bullying by remaining as uninvolved bystanders. No challenge is made to the bully thus creating the feeling within the group that the behavior is acceptable ... and then the "bully mentality" becomes the social or group norm. This lack of action on the part of bystanders reassures the bully that the bully behavior can continue and even encourages more such behavior. The impact on the victim of the bully is catastrophic. Not only does the bully win but others don't care and their lack of action on the victim's behalf validates the thought that "if anything is going to change, I am going to have to take matters into my own hands."

The school statistics are frightening. Cruel behavior among children is a universal problem. Over half of all primary and secondary students admit to witnessing some type of bullying in school. Fifteen percent of all school absences are related to fears of being bullied at school. Seventy percent of students themselves state that bullying is a problem at their schools. Approximately 160,000 students miss school every day due to fear of intimidation by others. One in every seven students is a bully or a victim of a bully. One out of every twenty students admits to having seen a student at school with a gun. One hundred thousand students carry a gun to school. A guarter of students who carry weapons to school have witnessed violence at home. Students themselves state that their schools are not safe. Forty-three percent of students fear harassment in the school bathroom. Teenagers themselves state that revenge is the strongest motivation for school shootings and further state that kids picking on other kids and bullying them causes teenagers to turn to lethal violence. There is a strong link between bullying and suicide. A British study notes that between 15 and 25 British school children suicide each year secondary to bullying.

What can we do?? First, we need to take bullying seriously. The end result of bullying can be emotional and physical injury which can impact one for life and can impact others and society as well as noted with Columbine. Keep in mind that those who bully are many times the victims of bullying and all types of abuse themselves. Bullies may be depressed and upset with their own lives and family situations. Children who are targeted by bullies many times fit a profile: they may be passive, easily intimidated, lacking in friends, younger, smaller, less experienced and less able to defend themselves. If a child is suspected of being a bully, then parents or teachers need to get him or her help. Without help academic, social, and/or legal problems can then ensue. If a child is a victim of bullying, ask them what is occurring. Provide for an open and honest and nonjudgmental dialogue. Let the child know that the bullying is not their fault and that they were appropriate in informing you of the events. Ask the child what they think should be done to address the problem. Has the child already tried to problem solve the issue? Discuss the matter with the teacher, counselor, or principal. If the issues permeate multiple aspects of school life, consider involvement with a select PTO committee involving parents who will use reasonable judgment. Do not encourage the student to retaliate. Instead, encourage the child to walk away from the bullying and go directly to a trusted teacher if necessary. Assist the child in what to say and rehearse their response with them. Encourage the child to be with friends so as to not appear so vulnerable when alone. Finally, remember the bully wants a response and lack of a response may cause him or her to turn in another direction.

There are many types of bullying: school bullying, workplace bullying, cyberbullying, protection racket bullying, political and terrorism bullying, etc. Regardless of the type it is abuse involving another person or another group establishing an imbalance of power to the abuser's advantage. It is real, it can be emotionally and physically incapacitating, and it can impact one for life. Unfortunately, it is all too common. By any standard, it is abuse and should not be tolerated.

Interview with an IMS Director - David C. Hall, MD

Tell us about your practice.

General neurosurgery, from complex spine to brain tumors, aneurysms, deep brain stimulators and endoscopic carpal tunnel. I enjoy a diverse practice.

Are you native to Indianapolis?

No, I was born in Canada. I am a US citizen and I went through the IU Neurosurgery residency program.

How did you choose Indianapolis to practice?

I had a lot of interaction with the neurosurgeons in Indianapolis, while I was at IU. My older brother, Dr. Peter V. Hall was a neurosurgeon at IU during my residency.

Tell us about your family.

I am married, my wife, Mary is a registered nurse. We have four children, Graham is a neurosurgery resident, Richard is working in China, Stuart is working in California, and our daughter, Kelli, is a senior at IU, Bloomington.

What are your leisure interests?

Traveling and long distance cycling.

What led you to medicine?

When I was nine, I was living in Michigan, and a career van from the University of Michigan came to visit and had a dissected heart with an artificial valve. I thought then, that I might want to be a cardiovascular surgeon. Also in my teens, I visited my brother, Dr. Peter Hall, at the Indianapolis Medical Center.

Who have been your mentors?

Dr. Robert Campbell, Dr. Julius Goodman, Dr. Henry Feuer and Dr. Peter Hall.

What gives you the most pride in your life? My family

Why is advocacy through the IMS for medicine important to you?

IMS allows physicians with widely different backgrounds to come together and help preserve and improve the practice of medicine in Indiana.

What/who or how did you get started in joining the IMS and taking a leadership position?

I have been a member of the IMS for many years; however, Dr. Paula Hall (not related) encouraged me to get involved at a different level. I became a delegate, then I worked with the Project Health program, and now I am on the Board of Directors.

What are the challenges you see in helping physicians become involved in the IMS?

Trying to balance the time between our medical practices and our families, along with the continued demands of the business side of medicine.

As a member of the Board of Directors, what are your goals for the IMS?

To continue to expand and obtain the input of physicians to the Society.

Share something about yourself that not many people know and that most people would find surprising.

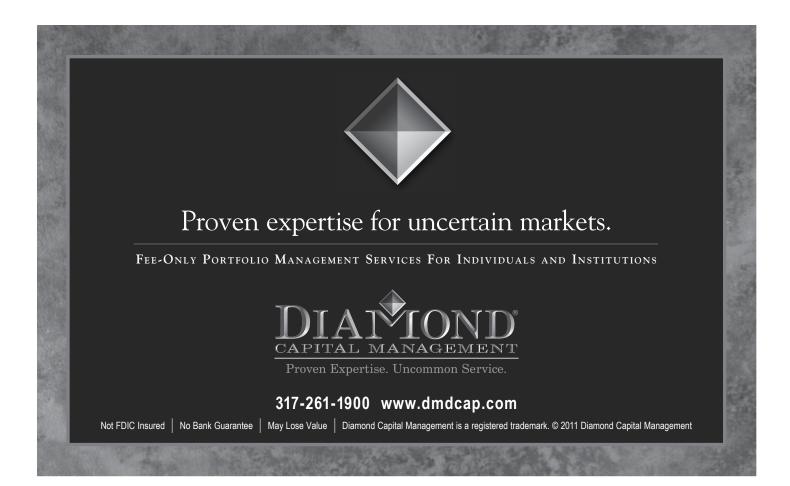

When I was in school in England, I kept a birdfeeder for canaries and finches, and I considered opening a pet shop, if I didn't pass my "O" level exams when I was 15 years old. ("O" levels are the entry level exams in England, similar to SAT exams in America.) I was able to complete my neurosurgery residency program and started private practice at the age of 29.

David Charles Hall, MD, is with Community Neurosurgery, 1400 N. Ritter Ave., #479, Indianapolis, Indiana. Dr. Hall is a board certified neurosurgeon. A graduate of University of London's Westminster Medical School, he completed his internship at the Pasqua Hospital, Saskatchewan, Canada and his residency at the IU Medical Center.

We get your patients back to life.

The Center for Pain Management is one of Central Indiana's most experienced medical practices focusing exclusively on treating patients who suffer from back, head, neck, joint or cancer-related pain.

This includes:

- · Acute injuries or treatment
- Spinal injuries
- Herniated discs
- Arthritis
- · Failed back surgery
- Chronic pain
- Migraines
- Fibromyalgia

Our team of clinicians and board-certified physicians specializes in comprehensive evidence-based diagnostic and multi-disciplinary treatment modalities that include:

- Interventional procedures
- Physical therapy
- Medication management
- Spinal cord stimulation
- Psychological counseling

Physician referrals and patient self-referrals are accepted.

George Peter Maiers, II, MD, an orthopedic surgeon with Methodist Sports Medicine / The Orthopedic Specialists was inducted as a Fellow of the American Academy of Orthopaedic Surgeons (AAOS) on February 15, 2011, during ceremonies at the Academy's 2011 Annual Meeting in San Diego.

Fellowship trained at the Cincinnati Sports Medicine and Orthopedic Center, Dr. Maiers specializes in sports medicine with a special emphasis on treatment of disorders of the hip and knee. A graduate of Indiana University and the Indiana University School of Medicine, Dr. Maiers is a member of the American Orthopedic Society of Sports Medicine, the Arthroscopy Association of North America and the International Society of Hip Arthroscopy. He is currently conducting research on arthroscopic treatment of hip impingement and arthroscopic treatment of ACL injuries.

Jeffrey M. Rothenberg, MD, Clinical Associate Professor, The Department of Obstetrics & Gynecology, Vice Chair for Faculty Development and Alumni Affairs, IU School of Medicine, Vice President: Indiana University Health Medical Staff, was the Program Director for the 41st Annual Conference of the Society for Humanism in Medicine, held in Crested Butte, Colorado in February. The program was entitled, "Back to Basics, Putting the Humanities into Humanism: An Experimental and Interactive Colloquium."

Jeffrey A. Greenberg, MD, Indiana Hand to Shoulder Center, published a chapter: "Repair of Distal Biceps Tendon Ruptures in the Should and Elbow Surgery." Dr. Greenberg was course instructor for "Upper Extremity Review Course: Hand and Wrist," at the Annual Meeting of the American Academy of Orthopaedic Surgeons held in San Diego, California in February. He was Chairman for the Stryker Hand and Upper Extremity Dissection Course held in Phoenix, Arizona in January 2011.

Theresa Rohr-Kirchgraber, MD, was recently the featured speaker at Cathedral High School Health Classes with the topic: "Ain't No Mountain Dew Good Enough: The Art Of Mindful Eating" or in other words, "Why Mountain Dew and Flaming Hot Cheetos is Not Lunch." Other recent speaking events for Dr. Rohr-Kirchgraber include: "The Shingles Vaccines," Sound Medicine, IUSM, National Public Radio, Jan. 2011; "Executive Health for Women: It Starts in the Kitchen," PRN Media www.blogtalkradio.com/prnhealth, Jan. 2011; "Autism and Vaccines: Why the Study Was Flawed," Radio Station WSBT, South Bend, Indiana, Jan. 2011; and "The New USDA Guidelines for School Lunch," Radio Station WSBT, South Bend, Indiana, Jan. 2011.

Rick C. Sasso, MD, Indiana Spine Group, had a paper, "Rigid Versus Non-Rigid Occipitocervical Fusion: A Clinical Comparison of Short Term Outcomes," in the February edition of Journal of Spinal Disorders and Techniques. He also published a book chapter, "Sacral Fractures," in the recently release textbook, Spine and Spinal Cord Trauma: Evidence Based Management.

from Northwest Radiology ...

New website can help patients navigate health care law

HealthCareandYou.org - a new online resource chock-full of easy-to-understand information for patients about the Affordable Care Act—launched yesterday, March 1. Designed to help all Americans make the right health care decisions for themselves and their families, the website features:

• Up-to-date facts about the law, including a timeline of when provisions take effect

•A state-by-state listing of health coverage options available to consumers now and in the future

 Information tailored to all ages and circumstances, including older Americans, young adults, small business owners and health care professionals

The site was developed by the Health Care and You Coalition, which is comprised of eight organizations, including the AMA, representing consumers, patients, physicians, nurses, hospitals and pharmacists. Other members of the coalition include: AARP, the American Academy of Family Physicians, the American Cancer Society Cancer Action Network, the American College of Physicians, the American Nurses Association, the Catholic Health Association of the United States and the National Community Pharmacists Association.

Bulletin Board (Continued from page 11.)

a comprehensive review of anatomical and clinical significance" both in Journal of Neurosurgery.

Joel C. Boaz, MD, published, "Analysis of the Risk of Shunt Failure or Infection Related to Cerebrospinal Fluid Cell Count, Protein Level, and Glucose Levels in Lowbirth-weight Premature Infants with Posthemorrhagic Hydrocephalus" in Journal of Neurosurgery: Pediatrics in February 2011

Thomas J. Leipzig, MD, served as course director for the American Association of Neurological Surgeon's course, 'Weekend Update: Interactive Review of Clinical Neurosurgery by Case Management' held in Orlando, Florida in February 2011. He spoke on cerebral aneurysms, AVMs, and other cerebrovascular issues.

Richard B. (Ben) Rodgers, MD, was named to the Forty Under 40 Class of 2011 sponsored by the Indianapolis Business Journal.

from Franciscan St. Francis Health ...

John B. Meding, MD, at the St. Francis "Road Show" on March 23, at the Bloomington-Monroe County Convention Center explained the latest procedures in joint replacement and arthritis treatments at the public seminar. He is a board-certified orthopedic surgeon specializing in adult reconstructive surgery and joint replacement.

James L. Gahimer, MD, a member of St. Francis Medical Group (SFMG), has established a practice with the newly created Center Grove Internal Medicine.

Board-certified and a Diplomat of the American Board of Internal Medicine, Dr. Gahimer has had previous positions with St. Francis, including the SFMG Physician Council, St. Francis Health Network Professional Services Committee and various clinical and teaching assignments.

Alan R. Gillespie, MD, former chief medical officer and vice president for Franciscan St. Francis Health, is the recipient of the hospital's Distinguished Service Award. He was selected for that honor by the hospital's medical executive committee and recently recognized at a ceremony in downtown Indianapolis.

David M. Mandelbaum, MD; Jonathan A. Mandelbaum, MD; Donald G. King, MD; Matthew J. Libke, MD and Mark **R. Edwards**, **MD**, (*no photo available*) have become part of the St. Francis Medical Group. The former Indy Southside Surgical five-surgeon team merged with St. Francis effective March 1, 2011. IMS

Project Health – Carrie Jackson Logsdon, Director

Thank you, Dr. Marc E. Duerden

Marc E. Duerden, MD, Rehabilitation Associates of Indiana, is Project Health's doctor of the month for April. He was born in Provo, Utah, and shortly after his birth, his father got a job at Purdue so he spent most of his pre-medical school years in West Lafayette. He received his

undergraduate degree in chemistry at Purdue, graduated from the IU School of Medicine and did his residency at Northwestern's Rehabilitation Institute of Chicago. He is Board Certified in Physical Medicine and Rehabilitation with a sub-certification in Spinal Cord Injury Medicine.

Dr. Duerden became interested in medicine when he was in the Boy Scouts. As a teenager and Eagle Scout, he joined a Medical Explorers Group. They would provide medical care for foot races and walk-a-thons under the supervision of volunteer physicians. He is still very involved in the Boy Scouts. He has five children, three boys and two girls, who he says are "into everything."

Dr. Duerden says his first real mentor was Elliott Roth, MD, at Northwestern. "He was head of the spinal cord team there. I spent a month with him as an elective, and he was there all through my residency." His second mentor was Randy Braddom, MD, the physician that lured him back to Indiana. "It was the best job out there after my training. Dr. Braddom was the physician that IU hired to be Chairman of Physical Medicine and Rehabilitation and get the residency program going in Indiana. He wrote the textbook and in the beginning our group practice was the main faculty."

Dr. Duerden is also on the board of "Badges without Borders" that teaches Spanish to police and firefighters. They do a three-week medical mission to immerse them into the Spanish language. "They do the triage, and I run the medical clinic." Mexico would be an unusual place to

meet a Project Health patient, but that's exactly what happened to Dr. Duerden. The mother of a Project Health patient has a house in Mexico with big dorm rooms in it, and that is where their mission group always stays. Her daughter was visiting and helping to build a house when she fell off the roof sustaining a severe head injury and fracturing her knee and wrist. The family took her to two different Mexican doctors, who made her mother pay \$200 up-front, didn't do any tests or x-rays, and told her she needed surgery to repair a torn ligament. Fortunately, Dr. Duerden stepped in and told her he would take care of her and she needed to come back to Indiana. He had no idea she was a Project Health patient. "It wasn't a torn ligament, it was a fracture, so we got her hooked up with orthopaedics here, and we were able to turn a bad injury into a good outcome." What a wonderful coincidence.

Dr. Duerden is a Past President of the Indianapolis Medical Society. "I believe that when we started Project Health in 2003 it was a defining moment for the IMS. It is one thing to be an organization that is collegial and doing social things, but it's important that the Society also be intimately involved in the community and provides a way for the physicians to give back." He says Project Health is the one thing physicians can do that doesn't require extra time and very minimal change to their current processes. "It doesn't steal time. It's time you would spend in the clinic anyway that allows you to give a coordinated level of care to the patients. That's why we went into medicine anyway. You don't have the administrative headaches. You provide access to care they would never have if it weren't for the whole package that Project Health offers."

It would appear as though Dr. Duerden is, thankfully, in the right place at the right time. Project Health is fortunate to have his participation.

IMS Bulletin, April 2011

why choose a brain surgeon

for your back and neck pain patients?

The spine is more than just bones. It contains the spinal cord, which connects to the brain. And all the nerves in the body connect to the spinal cord.

Only neurosurgeons have the advanced medical training to understand how the brain, spine and nerves function together as a whole, as the nervous system.

Pain management physicians work closely with our neurosurgeons to bring your patients the most options for pain relief.

Choose a brain surgeon for your patients with back and neck pain. Choose a neurosurgeon at Goodman Campbell Brain and Spine. Find out more at: www.goodmancampbell.com

(C)

GOODMAN CAMPBELL BRAIN AND SPINE

Goodman Campbell Brain and Spine is a merger of Indianapolis Neurosurgical Group and Indiana University School of Medicine Department of Neurological Surgery.

Private practice and academic neurosurgeons, collaborating for the good of patients

We proudly announce that American Physicians and The Doctors Company have united.

Together, we set a higher standard. We aggressively defend your name. We protect good medicine. We reward doctors for their loyalty. We ensure members benefit from our combined strength. We are not just any insurer. We are a company founded and led by doctors for doctors. We are the largest national insurer of physician and surgeon medical liability.

On October 22, 2010, The Doctors Company and American Physicians officially joined forces. With the addition of American Physicians, we have grown in numbers, talent, and perspective – strengthening our ability to relentlessly defend, protect, and reward our nearly 55,000 members nationwide. To learn more about how we can protect your livelihood and reputation with our medical professional liability program, call (800) 748-0465, or visit us at www.thedoctors.com.

We relentlessly defend, protect, and reward the practice of good medicine.

WARNING: Side effects may include envy and stares from your neighbors.

Let Litchfield create the estate of your dreams.

Indiana Psychiatric Society

2nd Annual Integrative Mental Health Conference: Legal Aspects & Medical Analysis

April 15-17, 2011

West Baden Springs Hotel, West Baden Springs, Indiana

Accredited for 11.0 AMA PRA Category 1 Credits, 11.0 CEU, 3.0 CLE/2.5 NLS

Registration/conference information at www.pdallc.com

Sponsors have assembled an outstanding group of nationallyknown speakers who will address the professional practice gaps and advance the participants' competence and effective use of targeted skills. This conference will focus on clinical understanding of ethical, forensic, and clinical issues related to end of life care, oncology, pain management, and sexual dysfunctions as well as touch upon health care reform legislative updates related to behavioral health. The conference opens with co-profession conversation on probate presented by forensics expert and psychiatrist Dr. George Parker and Rodney Retzner, Esq. This will be followed by a update on health care legislation by David Jose, Esq. Saturday starts with end of life issues and psychiatry with Dr. Greg Gramelspacher and Dr. Mary Helen Davis, The afternoon program will include psychiatrist, Dr. Dale Theobald alongside Dr. Sarah Parsons discussing oncology and pain management. Sunday morning, Dr. Julia Heiman of the nationally recognized Kinsey Institute for Research in Sex, Gender, and Reproduction will discuss sexual dysfunction and psychiatry. Speakers will present a balanced program of lectures and case scenarios to improve your understanding of these issues.

Discounted hotel rooms available at West Baden Springs, French Lick Hotel, Big Splash Adventure, & Comfort Suites. See pdallc.com for information.

Indiana Spine Group

Back Talk: A Comprehensive Review and Practical Approach to Spinal Diagnosis and Treatment

November 11 - 12, 2011

Renaissance Hotel, Medical Academic Center, Carmel, Indiana

Indiana Spine Group is hosting their fifth annual spine symposium. This symposium is for primary care physicians and health care practitioners, and will provide the latest information for the diagnosis and treatment of your patients with spinal problems and abnormalities. New this year are clinical workshops on Saturday. Visit http://indianaspinegroup.com/backtalk/2011/ backtalk.html

To receive conference announcements and a brochure, please send your email and mailing address to info@indianaspinegroup. com or call (317) 228-7000.

This activity has been approved for AMA PRA Category 1 Credit. Application for CME credit has been filed with the American Academy of Family Physicians. Determination of credit is pending.
