about our cover

On our cover: Independence Hall is the centerpiece of Independence National Historical Park located in Philadelphia, Pennsylvania. It is known primarily as the location where both the Declaration of Independence and the United States Constitution were debated and adopted.

The building was completed in 1753 as the Pennsylvania State House for the

Province of Pennsylvania. It became the principal meeting place of the Second Continental Congress from 1775 to 1783 and was the site of the Constitutional Convention in the summer of 1787. The building is part of Independence National Historic Park.

The inset is Rudolph Evans's statue of Thomas Jefferson from the Jefferson Memorial. The memorial is in Washington, D.C. and dedicated to Thomas Jefferson, an American Founding Father and the third President of the United States. The neoclassical building was designed by John Russell Pope. Construction began in 1939, the building was completed in 1943, and the bronze statue of Jefferson was added in 1947. The Jefferson Memorial is managed by the National Park Service under its National Mall and Memorial Parks division.

Accomplishments with Adversity

Illnesses of any type impact us. They make us realize how fragile we are. They make us recognize our own mortality. They alter our life course and may even shorten the life we had anticipated. Be they physical or be they psychiatric, we are all impacted by them either personally or by family or by friends and acquaintances. It is the personal impact of psychiatric illness that I would like to address. It is illness that knows no boundaries: racial, religious, ethnic, or financial.

Not everyone who has a mental illness is a train wreck! In fact most people with mental illnesses are people just like those who are reading this President's Page in this month's *IMS Bulletin*. In addition to physicians, however, they can be medical students, secretaries, teachers, city employees, and the like. Depending upon the severity of the illness, one's path may go several directions ranging from an attitude of acceptance and the feeling that "I'm doomed and never going to be really normal again or be able to function" to an attitude of determination and fortitude enabling one to work around their frailties and forge ahead and leave an indelible mark on society and the future. It is this latter group on which I would like to focus as it is amazing the number of noteworthy people who have left lasting accomplishments to the benefit of others, but who in their own lives struggled with various forms of mental illness.

For the history buffs among you the list of personalities is endless, so I will mention only the ones who might be more easily identified by all of us. Of more recent vintage is John Nash whose work in the game theory of economics earned him the 1994 Nobel Prize in Economics. At Princeton he was referred to as the "Phantom of Fine Hall" because of his reclusive nature and habit of roaming around various classrooms and leaving signs of his mathematical genius on classroom black boards. Few were aware at that time that he suffered from chronic paranoid schizophrenia.

Eugene O'Neill suffered from severe depression most of his life but in spite of that became the only American playwright to win a Nobel Prize for literature. His *Long Day's Journey into Night* and *Ah, Wilderness!* remain classics for eternity.

Vivien Leigh, famous for her leading role in *Gone With the Wind* experienced severe bouts of bipolar disorder (manic depressive illness at that time) and was even confined to a nursing home before ultimately responding dramatically to shock therapy (electroconvulsive therapy) only to succumb eventually to tuberculosis at the young age of 53 while she was filming her last movie *The Ship of Fools*.

Ruth Graham, daughter of Billy Graham, suffered for years with depression, an eating disorder, and intermittent suicidal thinking and eventually talked about it in her book *In Every Pew Sits A Broken Heart*. Her message today is that Christianity does not guarantee everyone a perfect life.

Isaac Newton, famous mathematician and noted for his discovery of the gravitational relationship between the moon and the earth along with the concept of centrifugal force, suffered from several "nervous breakdowns" and was noted for

his fits of rage with anyone who disagreed with him. In the end however he was the first scientist to be knighted by an English queen for his scientific contributions.

Vincent Van Gogh suffered from epilepsy secondary to indulging in excesses of absinthe, a strong liquor, and also experienced what now appears to have been wide mood swings with marked manias characterized by massive productivity of artistic treasures. At age 37, he suicided.

Ludwig van Beethoven suffered from a severe bipolar disorder. His manic episodes drove his creativity and yet his most significant works were created during times of severe depression and psychotic delusional thinking. To treat himself with what was available at that time he eventually resorted to opium and alcohol and later died of liver disease.

Charles Dickens suffered from intermittent depression and yet became one of the greatest authors in the English language. His struggles are documented in *The Key to Genius: Manic Depression and the Creative Life* by Jablow Hershman and Julian Lieb.

Ernest Hemingway, Pulitzer Prize winning author of numerous literary classics, was tormented by depression for years and ultimately suicided. His family history is yet to this day used as an example of the genetic tendency of depression to drift in families with several Hemingway relatives who have suicided.

Winston Churchill guided Britain through its darkest years in spite of bouts of depression which he himself referred to as "the black dog." It has been said that had he been a stable man knowing the odds his country was facing, he could never have inspired his nation during its time of crisis. He was noted to self-medicate with alcohol, but through sheer determination and in spite of his depression was able to guide a nation through its darkest hours.

In a somewhat similar situation to that of Churchill's, Abraham Lincoln rose to the occasion of saving a nation. Lincoln was noted to suffer from episodic depressions which at times nearly brought him to an absolute halt. The consequences of quitting however were so catastrophic to him that he continued to forge ahead, saved a nation and produced the most famous presidential address ever produced, *The Gettysburg Address*. The wear and exhaustion of Lincoln's melancholy is however clearly visible upon his multiple photographs.

Leo Tolstoy, author of *War and Peace*, discussed his own trials with mental illness in his memoir *Confession*. In this he discussed his depression, alcoholism, substance abuse, and hypochondriasis. His experiences are reviewed extensively in *The Dynamics of Creation*. Also reviewed in this book is the mental illness of Michelangelo who was undeniably one of the world's greatest artistic geniuses.

The list of significant people in their own right who have been afflicted with mental illness and yet produced and left a mark goes on and on: Tennessee Williams, American playwright;

Emergency Medical Care at The Indianapolis Motor Speedway

The Indianapolis Motor Speedway is the oldest continuously operating Motor Sports facility in America. Built originally in 1909 by Carl Fisher and James Allison as a test facility for the burgeoning automotive industry, the speedway is a 2 ½ mile rectangular oval course situated on 559 acres. The rich history of motorsports at the Indianapolis Motor Speedway began on 14 August 1909 with seven motorcycle races sanctioned by the Federation of American Motorcyclists (FAM). Originally 15 races had been planned for the weekend, but the remaining were cancelled due to concerns that the racing surface (which was crushed stone and tar) was not suitable for motorcycle events. The following weekend a series of

Infield Hospital in 1910. Shown here is the first motorized ambulance in Indianapolis (and purportedly in Indiana) owned by the Flanner and Buchanan Mortuary. Standing beside the ambulance is the driver, John "Pat" Patterson on the left, and Dr. H.R. Allen with student nurses Kitty Brewer, Jeanette Taylor, Wilma Entsminger and Marjorie Hunt.

16 automobile races were held sanctioned by the American Automobile Association (AAA). Throughout the weekend there were a number of crashes resulting in five fatalities. As a result of concern over the suitability of the track surface the speedway was re-surfaced utilizing 3.2 million paving bricks, hence the origin of the Indianapolis Motor Speedway's popular nickname "The Brickyard." Today the start/finish line is a 3 foot wide line paved with some of the original paving bricks and is known as the "Yard of Bricks."

The original track hospital was built in 1910, a year before the inaugural Indianapolis 500 Mile Race. Built near the garage area, the first infield hospital was a small single story, one room wooden structure with a platform on the roof from which the staff could watch the track activity. A new hospital of similar design but bigger was subsequently built and remained in service until 1948, when it was replaced with a cinderblock structure which serves as the original foundation of the current infield medical center.

From the beginning the medical staff for the Indianapolis Motor Speedway was volunteer nurses and house staff from Methodist Hospital in Indianapolis. The relationship between Methodist Hospital and the speedway has continued over the past 100 years with Methodist Hospital assisting with personnel and supplies for the Infield Hospital. The first Medical Director was Dr. Horace R. Allen, a general surgeon who held that position until 1937 when Dr. E. Rogers Smith assumed the Medical Director responsibilities. Dr. Smith retained the position from 1938 until 1951, followed by Dr. Caryle B. Bohner. During his tenure, Dr. Allen recruited a young intern named Dr. Thomas Hannah in 1932 to staff an ambulance in the first turn of the track. Dr. Hannah quickly fell

in love with motorsports medicine and volunteered to work every race after that until he was promoted to Assistant Medical Director in 1952 when Dr. C.B. Bohner assumed responsibilities of the IMS Medical Director. Upon Dr. Bohner's retirement in 1959, Dr. Thomas Hannah became Medical Director and continued in that position until 1981.

Dr. Hannah recruited and trained two young physicians who would later become leaders in the field of motorsports medicine. Dr. Henry Bock, an Emergency Medicine physician at Methodist Hospital began his long and productive career in motorsports medicine during Dr. Hannah's reign and succeeded Dr. Hannah as IMS Medical Director in 1982. Dr. Bock would then also assume responsibilities of the IndyCar Series Medical Director when

the series began in 1996. Dr. Steven Olvey, an Intensivist at Methodist Hospital also began his career in motorsports under the tutelage of Dr. Hannah. Dr. Olvey would later become the Medical Director for the Championship Auto Racing Teams (CART). Both Dr. Bock and Dr. Olvey have made significant contributions to safety and research in the motorsports field.

There are several motorsports events held at IMS; the Indy 500, the NASCAR Brickyard 400, the Red Bull MotoGP, and in the past, the United States Grand Prix. The Indianapolis Motor Speedway has approximately 300,000 "sold out" permanent seats and additional seats in temporary bleachers, luxury suites, and general admission resulting in a race day crowd of approximately 400,000 for the Indianapolis 500. The result is a population the size of a city within the boundaries of the Indianapolis Motor Speedway making the Indy 500 the largest single-day, single-venue sporting event in the world. While the other racing events at the IMS do not attract the same numbers, they are also well attended with spectator numbers in the hundreds of thousands.

While the original mission was most certainly the treatment of injured drivers, the volume of spectators quickly caused the medical division to expand its mission to include the provision of care to spectators. From the beginning the medical division has been intimately involved with issues of injury and illness prevention as well as treatment. Dr. Hannah was responsible for many advances in the quality of care at the IMS including formalizing the driver physical program, the provision for first aid stations around the grounds, the establishment of an "intensive care unit" in the infield hospital for initiating treatment of patients with coronary syndromes, helicopter

COMBINING OUR STRENGTHS

Dedicated to Hope, Healing and Recovery

We are proud to announce that we have combined the strengths of Kindred Healthcare and RehabCare. Through the delivery of quality, integrated post-acute care, we will carry out the promises of both companies to help our patients regain their lives and return home as quickly as possible.

After a hospital stay, many patients require ongoing rehab and nursing care to fully recover. At Kindred and RehabCare, we are uniquely positioned to meet those needs and continue the care for patients in settings across the post-acute continuum. As the nation's premier provider of rehabilitation and post-acute care, our strong relationships with other providers and our physician partners improves our ability to manage episodes of care while at the same time improving quality and reducing costs.

Kindred now delivers care in 46 states in 121 long-term acute care hospitals, 118 inpatient rehabilitation facilities (primarily hospital-based units), 224 nursing and rehabilitation centers, approximately 1,870 rehabilitation service locations and 19 hospice and home care locations, through our 76,000 caring and dedicated colleagues.

For more information about Kindred Healthcare and how we **Continue the Care** every day, please visit www.kindredhealthcare.com.

Board-Certified Pain Management Specialists*

Visit IndyPain.com to learn more about our newest physician - Jocelyn L. Bush!

We get your patients back to life.

The Center for Pain Management is one of Central Indiana's most experienced medical practices focusing exclusively on treating patients who suffer from back, head, neck, joint or cancer-related pain.

This includes:

- Acute injuries or treatment
- Spinal injuries
- Herniated discs
- Arthritis
- Failed back surgery
- Chronic pain
- Migraines
- Fibromyalgia

Our team of clinicians and board-certified physicians specializes in comprehensive evidence-based diagnostic and multi-disciplinary treatment modalities that include:

- Interventional procedures
- Physical therapy
- Medication management
- Spinal cord stimulation
- Psychological counseling

Physician referrals and patient self-referrals are accepted.

Richard D. Feldman, MD, has been awarded the First Annual Fellowship in the History of Family Medicine for his project "Family Practice Stories," by The Center for the History of Family Medicine (CHFM). Dr. Feldman is a practicing family physician at the St. Francis Hospital and Health Centers in Beech Grove, Indiana, where he has served as Program Director of the Family Medicine Residency Program since 1981, and as Director of Medical Education since 1999. Dr. Feldman also currently serves as an Assistant Clinical Professor at the Indiana University School of Medicine in Indianapolis.

Dean D.T. Maglinte, MD, Distinguished Professor of Radiology and Imaging Sciences, Indiana University School of Medicine was awarded Honorary Fellowship by the European Society of Gastrointestinal and Abdominal Radiology (ESGAR) in recognition of his outstanding contributions to Gastrointestinal and Abdominal Radiology on the occasion of the 22nd Annual Meeting and Postgraduate Course of ESGAR in Venice, Italy, May 21-24, 2011.

Dan A. Waxman, MD, EVP and Chief Medical Officer at the Indiana Blood Center, was named president of America's Blood Centers by the ABC in March 2011.

Homer F. Beltz, MD, has been inducted as a Fellow in the American College of Radiology (ACR). The induction took place at a formal convocation ceremony during the 88th ACR Annual Meeting and Chapter Leadership conference May, 2011, in Washington, DC. Dr. Beltz is past president and CEO of Northwest Radiology P.C. He is a member of the ACR and the Radiological Society of North America (RSNA).

Joseph F. Fitzgerald, MD, gastroenterologist at Riley Hospital for Children, was honored at the 64th Annual Medical Reunion Weekend in May with the Glenn W. Irwin Jr., MD, Distinguished Faculty Award.

Douglass S. Hale, MD, Urogynecology Associates, Director Female Pelvic Medicine and Reconstructive Surgery Fellowship, Associate Clinical Professor, IU Health Methodist Hospital served as scientific program chair for 37th Annual Scientific Meeting of the Society of Gynecologic Surgeons in San Antonio, Texas this past April.

Jeffrey M. Rothenberg, MD, Clinical Associate Professor, Department of Obstetrics & Gynecology, IU School of Medicine, gave the opening presentation entitled: "The Power of Healing Through the Arts," as well as, a workshop on "Visual Thinking Strategies" at the Arts & Healing Professional Development Conference at the Indiana University School of Medicine in May 2011.

Rick C. Sasso, MD, Indiana Spine Group, published the article, "Sagittal Alignment After Bryan Cervical Arthroplasty," in *Spine Journal*.

News from Franciscan St. Francis Health ...

Richard J. Shea, MD, spoke in Columbus, Indiana, in June on the significance of heart murmurs and discussed the latest therapies for heart valve disease.

Robert A. Malinzak, MD, Joint Replacement Surgeons, is now seeing patients at the Franciscan St. Francis Health-Indianapolis hospital campus.

why choose a brain surgeon for your back and neck pain patients?

The spine is more than just bones. It contains the spinal cord, which connects to the brain. And all the nerves in the body connect to the spinal cord.

Only neurosurgeons have the advanced medical training to understand how the brain, spine and nerves function together as a whole, as the nervous system.

Pain management physicians work closely with our neurosurgeons to bring your patients the most options for pain relief.

Choose a brain surgeon for your patients with back and neck pain. Choose a neurosurgeon at Goodman Campbell Brain and Spine. Find out more at: www.goodmancampbell.com

GOODMAN CAMPBELL BRAIN AND SPINE

Goodman Campbell Brain and Spine is a merger of Indianapolis Neurosurgical Group and Indiana University School of Medicine Department of Neurological Surgery.

*Private practice and academic neurosurgeons,
collaborating for the good of patients*

Laurie Ackerman, MD
Pediatric neurosurgery

Joel Boaz, MD
Pediatric neurosurgery

Project Health

Carrie Jackson Logsdon, Director

Thank you, Dr. Betty R. Raney

Betty R. Raney, MD, Zionsville OB/GYN, is Project Health's feature doctor for the month of July.

She was born in Chicago, where her father was in his residency at Northwestern. They actually lived in Michigan City, and her Mom had to take the train into the city to deliver her. Her parents were medical missionaries; in 1958 they moved to

Chiang Rai, Thailand, when she was three. It is in the far northwest corner of Thailand and is home to the great Emerald Buddha.

Dr. Raney remembers that when it came time for one of her sisters to be born there, the nurses lined up all the laboring women on wooden benches outside the hospital and checked on them every once in a while. "My Mom kept insisting the baby was coming and no sooner than the nurse objected along came my sister." She had three sisters and one brother, all home schooled.

"When we arrived there were no stores, only an open air market. We had water buffalos and elephants in the yard.

The small hospital did a few "band aid" things, so we all got in there with Mom and Dad scrubbed it down, opened a radiology unit, then an ER, and he made it his life's work. He was both a family physician and general surgeon. He had to handle anything that walked in the door."

Dr. Raney says she knew she wanted to be a doctor by the age of seven. "We used to go on village trips up and down the Mekong River. A guide would get us through the jungle to the tribal villages and we would administer vaccinations and tend to minor medical issues."

Dr. Raney says they left Thailand in 1975 when they started seeing army trucks and lots of soldiers with guns. By then, the Viet Nam War had escalated. She never felt in danger and still keeps in touch with friends there. Her parents retired from mission work and moved to Paoli, because they wanted to practice in an underserved area. Both of her parents graduated from Hanover, so that is where she ended up. "As soon as the last kid was out of the house, my parents went back to Thailand."

She graduated from I.U. Medical School and did her residency and internships at Methodist Hospital. During her senior year in medical school she had a daughter, and that cemented her decision to become an OB/GYN. "I just looked at my daughter and thought if I did general surgery I wouldn't see her for 5 years. The OB rotation was more humane and we were only on call every 3rd day." Dr. Raney also has a son.

"I always admired my Dad and wanted to do something like this, and Project Health allowed that. The patients are amazing. They are responsible, intelligent, dependable patients. They are good solid people and thankful for what we're doing. They just blend in with the practice.

When I retire I will go somewhere and do mission work, somewhere where people don't have medical care."

Project Health is grateful to have Dr. Raney here and now, where so many women are in need. On behalf of the staff and patients – THANK YOU!

In Memoriam

D. Duane Houser, MD
1939 - 2011

Dr. D. Duane Houser, 72, Greenfield, Indiana died May 10, 2011. A dedicated physician truly called with a gift of healing, Dr. Houser was known for the compassion and quality of care he gave over 40 years of private & clinical practice and teaching. He was born May 3, 1939 in Rockford, Ohio.

Dr. Houser received his undergraduate degree from Taylor University. After graduating from Indiana University School of Medicine, he completed his internship and medicine residency at Methodist Hospital. He then finished an Allergy/Asthma/Immunology Fellowship at the State University of New York at Buffalo.

Dr. Houser served in the Air Force during the Vietnam Conflict, practicing Allergy and Immunology at Malcolm Grow Medical Center, Andrews Air Force Base in Washington, DC.

Dr. Houser was board certified and a Diplomat of The American Board of Allergy and Immunology. He was a fellow of the American Academy of Allergy, Asthma, and Immunology (FAAAAI), a member of the College of Occupational and Environmental Medicine (ACOEM), and a fellow of the College of Chest Physicians (FCCP).

Dr. Houser received the Teacher of the Year Award from Methodist Hospital. He was past president of the Allergy & Immunology Service at St. Vincent Hospital and the Indiana State Allergy Asthma and Immunology Society. Dr. Houser served at the Indiana University School of Medicine as Associate Professor of Clinical Medicine and Director of the Asthma and Allergy Center, which he helped establish.

George Anthony Rowe, MD
1940 - 2011

George Anthony Rowe, MD, passed away on May 20, 2011. He was born October 18, 1940

Dr. Rowe attended Schulte High School in Terre Haute as a freshman, but finished his secondary education at Mount Saint Francis Franciscan Seminary in Floyds Knobs, Indiana. He earned his B.S. at Indiana State University in 1963 and his MD from the Indiana University School of Medicine in 1965. Dr. Rowe served his surgery internship and general surgery residency at Methodist Hospital in Indianapolis.

Following his active duty military, he served a pediatric surgery fellowship at Children's hospital in Cincinnati. Between 1970 and 1972, Dr. Rowe was on active duty with the United States Army, serving at Redstone Arsenal in Huntsville, Alabama. Between 1983 and 1993, he served in the Army Reserves. He was a Flight Surgeon with the 38th Aviation Brigade and Commander of the 149th MASH Unit. He retired with the rank of Colonel having been awarded Army Commendation and Achievement Awards.

Until his retirement in 2007, he served at Community Hospital of Indianapolis and Indiana Surgery Center North. He was a member of many professional organizations during his career including the American College of Surgeons, American Pediatric Surgical Association, the Society of American Gastrointestinal Surgeons, the American Academy of Pediatrics, the Society of Army Flight Surgeons and the Association of Military Surgeons of the U.S.

Edward Francis Steinmetz, MD
1925 - 2011

Edward Francis Steinmetz, MD, 86, passed away on May 27, 2011. He was born May 13, 1925 in Indianapolis.

Dr. Steinmetz was a graduate of Cathedral High School, earned his pre-med and medical degrees from Indiana University. He completed his internship at St. Vincent's, Indianapolis, and his residency at General Hospital, Indianapolis.

A veteran, Dr. Steinmetz served from June 1943 until May 1946; his rank at discharge was ARM 3/c.

Dr. Steinmetz was one of the recipients of the first St. Vincent Distinguished Physician Awards.

A Northside Cardiology member and cardiologist, he was an officer of the American College of Cardiology, a member of the board of directors of the St. Vincent Hospital Foundation and a proficient lecturer and writer.

Dr. Steinmetz served the IMS as Alternate Delegate to the State Convention from 1969-1972 and in 1996-2003, as well as, serving on the Physician Assistance Peer Review Committee from 1979-1984 and again in 1986.

IMS

Special Feature *(Continued from page 8)*

transport of injured drivers to the trauma center, and specialized "crash trucks" stationed at each end of the track for on-track response to race car crashes. Each crash truck was staffed with medics, a respiratory therapist, and a physician.

The medical division has been actively involved in research into motorsports injuries and has made major contributions to the development of helmets, restraint systems, car design, seat design, safer barrier design, and catchment system design. As a result of these efforts, while an increasing number of participants and an increasing number of races within the IndyCar Series has resulted in increasing numbers of crashes, the driver injuries have steadily decreased over the years and in 2008 there were no significant driver injuries in the IndyCar Series.

Currently, the hospital is approximately 6,000 square feet and divided into a driver care area and a spectator care area. There are separate entrances in order to protect the drivers from curious onlookers. There are 4 driver beds complete with provisions for hemodynamic monitoring in an area suitable for trauma resuscitation, and 14 spectator beds, 6 of which are capable of hemodynamic monitoring. The infield hospital is complemented by 14 first aid stations strategically located around the IMS grounds, 14 ambulances for spectator care, six track surface ambulances, seven golf cart ambulances, eight medic teams on foot, and two pit medic teams. The infield hospital is staffed with the Medical Director and Medical Manager, between six and nine Emergency Medicine physicians (depending on track activity), up to 15 RN's, and an Optometrist. A communications room is located in the infield hospital from which all ambulances and roving medic teams are dispatched and tracked.

A graduate of the University of Cincinnati College of Medicine and the Methodist Hospital Emergency Medicine Residency Program, Geoffrey L. Billows, MD, is Assistant Professor of Clinical Emergency Medicine for the Indiana University School of Medicine. Dr. Billows is the Medical Director for the Indianapolis Motor Speedway. The author would like to acknowledge and thank Dr. Henry Bock, past Medical Director of IMS; Dr. Michael Olinger, Medical Director of Indy Car Series; and Donald Davidson, IMS historian for their contributions and assistance.

Specialists in the Care of Adult and Childhood Spinal Diseases

THE
S P I N E
INSTITUTE

Services:

The Spine Institute provides conservative and surgical care of adult and pediatric disorders.

The physicians offer expertise in all areas of Spine care including:

- Disc diseases, herniations and stenosis
- Scoliosis/Deformity – Adult & Pediatric
 - Spine fractures
 - Spine tumors
- Degenerative neck and back disorders
 - Revision surgery
 - Congenital disorders
 - Spinal cord stimulation
 - Workers' compensation

Physician Referral:

When acute disorders require more aggressive approaches, or when recovery is extended and threatens to become chronic, The Spine Institute stands as a partner to physicians in providing specialized spine evaluations, surgical opinions and rehabilitation. Continuity of care is the goal of our practice and patients are returned to referring physicians with timely reports and full documentation.

President's Page *(Continued from page 7)*

Buzz Aldrin, astronaut; Marlon Brando, actor; Tchaikovsky, composer who suicided; Irving Berlin, composer; John Keats, poet; Dick Clark, entertainer; Virginia Woolf, British novelist; Robert Schumann, "the inspired poet of human suffering;" and the list continues...

What did all these people have in common? They were frail human beings vulnerable to the ravages of various mental illnesses just like the rest of us in this world who, in spite of this, performed remarkable feats which left footprints for all time. They were creative, indefatigable, and able to channel their goals around at times stupendous odds. They have bequeathed to us works of art, literary masterpieces, and saved entire nations and they accomplished all this wearing the cloak of chronic and at times severe mental illness.

From the AMA ...

AMA names new executive vice president/CEO

On June 2, 2001, the AMA named James L. Madara, MD, as its new executive vice president and CEO. Dr. Madara will assume leadership of the nation's oldest and largest physician group July 1, 2011.

Dr. Madara, 60, is an accomplished academic medical center physician, medical scientist and administrator who served as Timmie Professor and chair of the Department of Pathology and Laboratory Medicine at the Emory University School of Medicine before assuming the Thompson Distinguished Service Professorship and deanship at the University of Chicago Pritzker School of Medicine. Dr. Madara was the longest-serving Pritzker dean in the last 35 years.

Bulletin Board *(Continued from page 11)*

Huntley also proctored surgeons for da Vinci robotic sleep apnea surgery at The Brigham and Women's Hospital in Boston and was an invited instructor at SLEEP, the annual meeting of the American Academy of Sleep Medicine in Minneapolis.

Scott E. Phillips, MD, an Air Force reservist and space shuttle flight surgeon, was flight surgeon for the final launch of the shuttle Endeavour on May 16th. He was also interviewed in May for a local television news story on inhalant allergies.

Edward J. Krowiak, MD, gave an invited lecture on da Vinci robotic head and neck cancer surgery and transaxillary robotic thyroid surgery to a group of oncologists and primary physicians in Terre Haute in mid-May.

News from Goodman Campbell Brain & Spine ...

James D. Callahan, MD, and **Aaron A. Cohen-Gadol, MD**, published, "Extramedullary spinal ependymoma: A diagnostic challenge and review of the literature" in the March issue of *Clinical Neurology and Neurosurgery*.

Daniel H. Fulkerson, MD, and **Joel C. Boaz, MD**, published, "Analysis of the Risk of Shunt Failure or Infection Related to Cerebrospinal Fluid Cell Count, Protein Level, and Glucose Levels in Low-birth-weight Premature Infants with Posthemorrhagic Hydrocephalus" in *Journal of Neurosurgery: Pediatrics* in February 2011.

In addition, Dr. Fulkerson contributed to the article, "Neurosurgical rotations/clerkships in U.S. medical schools" in *Journal of Neurosurgery*, January 2011.

Jean-Pierre Mobasser, MD, was a panelist on "New and Evolving Technologies for Minimally Invasive Surgery of the Lumbar Disc" at the American Association of Neurological Surgeons scientific meeting in April in Denver. He presented on two different evolving techniques: the first on a new method of placing pedicle screws and the second on a new device for spinal stenosis.

Troy D. Payner, MD, published, "Interinstitutional and interstate teleneuropathology" in the May 2011 issue of *Journal of Pathology Informatics*. In addition, Dr. Payner was faculty for the course, "Operative Nuances for Cranial and Skull Base Procedures: A Cadaveric and Case Based Microsurgical 3-D Video Presentation" as well as two practice management courses at the American Association of Neurological Surgeons conference in Denver.

Scott A. Shapiro, MD, was a panelist for the course, "Management of Acute Spinal Cord Injuries" at the American Association of Neurological Surgeons scientific meeting on April 12.
