Attention, Acute or Chronic Back or Spine Pain Sufferers!

Minimally Invasive Diagnosis, Treatment & Pain Management Available In Carmel.

Minimally Invasive Surgery Vs. Open Spine Surgery

Outpatient Procedure • Less Bleeding; Minimal Scar Formation
• Quick Recovery • Affordable

TYPES OF PAIN TREATED

- Acute & Chronic Back Pain
- Herniated Discs
- Lower Back, Buttock, Leg and Foot
- Neck Pain & Arthritis & Related Headaches
- Spinal Arthritis
- Spinal Osteoarthritis
- Degenerative Disc Disease
- Work & Sports Related Injuries

Steven E. Levine, MD

Dr. Steven E. Levine is board certified in Pain Management and Anesthesiology by the American Board of Anesthesiology since 1994, and also is a diplomat of the American Board of Pain Medicine since 1996. He is a fellow, charter member, and on the Board of Directors for the American Board of Minimally Invasive Spinal Medicine and Surgery. Dr. Levine is a leader in developing and teaching new techniques in interventional pain management both nationally and internationally.

William L. Hall, MD

Dr. William L. Hall is Board Certified by the American Board of Physical Medicine and Rehabilitation, and the American Board of Pain Medicine. Dr. Hall joined Midwest Pain Institute after completing his residency at the University of Cincinnati in August 2002. Dr. Hall served as chief resident in the department of Physical Medicine and Rehabilitation, with duties both academic and administrative in nature. He has focused his skills and talents on the diagnosis and treatment of back and spinal pain.

Kent B. Remley, MD

Dr. Kent B. Remley, a graduate of IU School of Medicine, is an Interventional Neuroradiologist specializing in minimally invasive spine surgery as well as diagnostic and therapeutic injection procedures of the head, neck and spine. Prior to practicing in Atlanta and Indianapolis he served as an assistant professor of Radiology and Otolaryngology and director of ENT/ Head and Neck Imaging at the University Of Minnesota and was a clinical instructor in Neuroradiology at the University of California, San Francisco.

Take Heart ... All will be well

February is heart month. For some, that heart is for Valentine's Day, and for others, it's American Heart Association. For me, the focus is not only on good health and continued devotion to others, but on IMS.

My message in January was on the needs of IMS. Now let's get to the heart of the matter.

Do you realize that the IMS was organized in 1848? That's decades of wars, famine, recession, depression, loss, challenges ... the IMS is still here and will continue to be (and we predate the ISMA by one year, for anyone keeping track). Your leadership and IMS staffers are dedicated to that resolve. We've heard from some of you but we need your membership, your leadership and your participation.

It is time for your voice – the voice of medicine in the greater Indianapolis area – to be heard. What other Society requests from its members ... Talk with us. Grow with us. We want you. We have challenges, but we have always persevered. IMS was, has been and will be the voice for physicians and the practice of medicine here ... that's our message statement and our credo.

Physicians today are faced with innumerable challenges – so were the physicians in the great depression, during wars and during “good times.” As a group, we physicians are remarkable in our knowledge and our commitments to others ... We have heart!

I have, on occasion, read some old IMS Bulletins. The challenges discussed in those old magazines are very similar to what we face now from regulations, policies and finances. IMS and our physician members have always overcome.

Some physicians today are walking away from the challenges in our profession and also the IMS. A wise person once said, “You can't complain if you don't vote.”

My thought is that “we can't make things better for medicine, our patients and us by walking away or remaining silent.” Now is the time to “Take Heart.”

In my practice, I deal with depression on a daily basis. Treatment can be difficult and challenging. I am sorry to say, and you no doubt know, that some physicians are depressed as well. We don't have a wellness program, but if that is something you want or need ... we can do that for you.

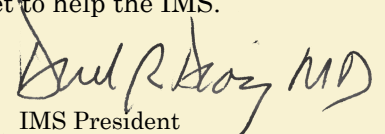

Do you want a forum to just talk medicine? Or not talk medicine? Want an opportunity to “get together” as peers and discuss whatever the day brings? We can do that, too.

Want more help with running your practice or the business side of medicine? We can do that. Want discounts to events, museums, dining? We will get them.

Your IMS leadership and staff want to provide members with the tools needed for support, for collegiality and for personal and professional growth. Tell us what you want.

With met needs, come commitments from members, membership retention and growth. As with all organizations or “sales” the best advertising is word of mouth ... Ask your practice manager to make sure your membership is paid, then, encourage, ask, and solicit your colleagues to join. If we don't have what you want and need, we will find a way to make that happen.

The IMS has heart ... Take a moment to encourage each other; tell your family and friends what they really mean to you; donate to the American Heart Association; and, of course, don't forget to help the IMS.

IMS President

Pygmy Nuthatch

William H. Dick, MD

Speaker: Kevin Carlsen – Hiking the Grand Canyon

This article will be similar to the March 2014 piece. In that one, we were left to imagine what the Appalachian Trail looked like from prose, not from photos. If you attended the December meeting, you saw terrific slides of one of the world's great natural wonders.

The speaker, Kevin Carlsen, told us that the Grand Canyon began as a crack in the earth about 18 million years ago. The Colorado River then flowed into the crevice and traveled all the way to the Gulf of Mexico, thus carving the canyon. The earth is 5 billion years old; there are rocks at the bottom of the Canyon that are over 2 billion years old.

Kevin Carlsen was born in New Hampshire and traveled to Indianapolis to start a construction firm. That was his day job. He volunteered at Eagle Creek Park, and eventually he was hired on as a Naturalist. After the Earth Discovery Center was built for over \$4 million in 2007, the old J.K. Lilly, Jr. house was vacant. Carlsen proposed that the home be remodeled for use as a bird sanctuary; he said that it could be built for \$100,000. That can be done, said the Parks Department, but you need to come up with the money. One week later, Kevin had the money. It wasn't his – he is not a wealthy man.

Kevin's wealth lies in his knowledge of nature, especially birds. He was named the Indianapolis Environmentalist of the Year in 2010 by IPL. He is an outstanding nature photographer, again mostly with birds.

The Grand Canyon became a National Park in 1919 and it tallies 6 million visitors a year. Only 8% of the people hike the Canyon and of that group, only 1% hike to the bottom, with few of those completing the trip in one day. 2014 was the 41st hike to the bottom for Mr. Carlsen. In recent years, he has hiked to the bottom and back to the top in one day! There are 1500 plants, 350 species of birds, 90 species of mammals and 45 species of reptiles. The canyon is 277 miles long, 6,000 feet deep and four to 18 miles wide. The water temperature at the bottom is 46F.

Photos of various birds met on the trail were featured on Kevin's slides: Ravens, Pygmy Nuthatches and Scrub Jays. Bighorn sheep may be seen at certain times of the year. Petroglyphs may be viewed on canyon walls. Raft trips down the river are known to most and some in the audience had done that, including, of course, Kevin Carlsen.

Mr. Carlsen uses the South Kebab Trail to descend into the Canyon and then returns on the Bright Angel Trail to come back to the top of the South Rim. Mules have the right of way on the trails. Kevin leaves early in the morning, which is a great time for taking photos. He may return as early as 6 p.m. or as late as 10 p.m.

At the bottom are cabins and bunkhouses for those wishing to stay overnight. Cabins have space for 4-10 people and bunkhouses are separated by gender. There is a fine restaurant at the bottom, awash with good food and souvenirs (plus beer and wine). You can send back a post card from the bottom of the canyon; it is carried to the top by a mule

Kevin usually hikes with family and/or several friends. He teaches them how to prepare their body for the trek. Exercises and walking instructions are given for the six-month preparatory period. The extensive preparation is both physical and mental. Once at the canyon, food and fluids must be consumed all day long. In addition to water, electrolytes must be drunk. Kevin Carlsen showed photos of many well-known sites, including many waterfalls, portions of rapids and the Colorado River.

Naturally, there were many photos of the Canyon walls and of the rim. Kevin told us that "no photo can show the beauty of the canyon." It is truly one of nature's finest wonders and it is a must see. Everyone in the room had been to the Grand Canyon. The group really enjoyed Mr. Carlsen's presentation and there were many questions after the talk. What a place!

offers the following insurance programs exclusively for ISMA members:

Health - PPO & Traditional plans from \$250 to \$5,000 deductibles	Voluntary Employee Benefit Plan Dental, short term disability, term life, universal life, cancer plan, Section 125 Premium Only Plan (P.O.P.)	Term Life
Health Savings Account Plan		Disability
Medicare Carve-out		Umbrella Liability
Dental	Auto	Business Owners Policy
Long Term Care	Homeowners	Worker's Compensation
		Malpractice Liability*

These insurance plans have been specifically designed for ISMA members and their employees to provide the highest quality coverage at the lowest possible cost.

* Access is available through Medical Assurance of Indiana - ISMA's endorsed professional liability carrier.

Why choose a brain surgeon for your back and neck pain?

...Because... your spine is more than just bones. The bones support your back and neck, and protect the nervous tissue called the spinal cord. The spinal cord connects to all your nerves and it connects to your brain.

When you have back and neck pain, you need someone with advanced medical training who understands how the brain functions together with your spine and nerves—you need a neurosurgeon.

Neurosurgeons work closely with pain management physicians to bring you the most options for pain relief.

To treat your back and neck pain, choose someone who will understand your brain and your spine. Ask your doctor if a neurosurgeon at Goodman Campbell Brain and Spine is right for you. Find out more at: www.goodmancampbell.com

Francis W. Price, Jr., MD and **Matthew T. Feng, MD** of Price Vision Group recently were invited speakers at the scientific meeting of the Asia Cornea Society in Taipei, Taiwan, on topics relating to LASIK, glaucoma, and corneal transplants. Dr. Price was presented with the Asia Cornea Foundation Medal and delivered the Key Note Lecture.

Theresa M. Rohr-Kirchgraber, MD, reported on December 5, 2014 for the *Sound Medicine News* as an expert in Health and Wellness, on "Getting the Most Out of a Vegetarian Diet." <http://soundmedicine.org/post/getting-most-out-vegetarian-diet>

James K. Cole, MD, an orthopaedic spine surgeon, has joined Community Physician Network, at its offices in Indianapolis, Greenwood and Shelbyville. He completed his medical degree at East Tennessee State University.

News from JWM Neurology ...

Neurologist **Kevin J. Puzio, MD**, has joined JWM Neurology. Dr. Puzio has practiced in the Indianapolis area since the late 1980s. He received his Medical Degree from Wayne State University School of Medicine, Detroit, Michigan in 1982. Dr. Puzio completed a Neurology residency in 1986 and a Clinical Neurophysiology fellowship in 1987, both at Henry Ford Hospital in Detroit, MI. He practices general Neurology and sees adult patients with all types of neurological conditions.

JWM Neurologist **Jeffrey W. Hilburn, MD**, has been named President-Elect of the American Heart Association's Midwest Affiliate Indianapolis Metro Board of Directors. He also recently spoke at the St. Vincent Hospital Medical Group Update in Cardiology on the topic of whether: "Every Stroke Patient Should Have an Echocardiogram."

News from Goodman Campbell Brain and Spine...

Aaron A. Cohen-Gadol, MD, and coauthors conducted a cadaver study to better understand the causes of occipital neuralgia by examining the muscular course of the greater occipital nerve (GON). This investigation revealed variations in the muscular course, which led the authors to describe an enhanced classification scheme for the morphology in this region. Their description was published in *Surgical Neurology International*, October 31, 2014.

Dr. Cohen and others also published an article that describes a technique of using motor fiber tract stimulation during surgery to map the corticospinal tracts associated with an intramedullary tumor. The article appeared in the *Journal of Neurosurgery, Spine*, November 28, 2014.

In another article, Dr. Cohen, and coauthors explored the molecular mechanisms underlying the possible causes of peritumoral seizures that are an early symptom of glioblastoma multiforme (GBM). They studied a mouse model and tumor tissue from humans with GBM. Their data suggested that overexcitation of N-methyl-d-aspartate (NMDA) receptors may contribute to the development of seizures and that certain phosphorylated NMDA receptors may be a potential therapeutic target for blocking them. Their results were published in the December 2014 issue of *Neurosurgical Focus*.

In the December 17, 2014 issue of *World Neurosurgery*, Dr. Cohen and coauthors described their personal experiences with intraoperative aneurysm rupture (IOR). In this work, the authors presented a decade of experience with managing IOR for microsurgical treatment of complex cerebral aneurysm procedures.

Scott A. Shapiro, MD

Dr. Cohen, **Andrew J. DeNardo, MD**, **Thomas J. Leipzig, MD**, **Troy D. Payner, MD**, **John A. Scott, MD**, and others assessed outcomes for 102 patients who were treated for posterior inferior cerebellar artery (PICA) aneurysms. Results of this study, which compared endovascular and microsurgical clip ligation, appeared in the December 22, 2014, issue of *World Neurosurgery*.

Eric M. Horn, MD, presented "Craniocervical Anatomy and Parameters" at the Neuroscience Grand Rounds held on December 10, 2014, at the IU Health Neuroscience Center in Indianapolis, Indiana.

Amy D. Leland, MD, was appointed President of the Indiana Society for Physical Medicine and Rehabilitation, effective November 2014.

Jean-Pierre Mobasser, MD, moderated the national meeting of the Society for Minimally Invasive Spine Surgery (SMISS) held in September 2014. Dr. Mobasser is also a member of the SMISS Scientific Committee. In addition, he has been newly appointed to two positions within St. Vincent Indianapolis Hospital: Member of the Surgical Governance Council and Chairman of the New Technology Committee.

Mitesh V. Shah, MD, began a 2-year term as President of the Board of Goodman Campbell Brain and Spine, effective January 1, 2015.

In February 2015, Dr. Shah and coauthors will present at the International Stroke Conference. The title of their accepted abstract is "The Safety and Efficacy of Image-Guided Trans-sulcal Radial Corridors for Hematoma Evacuation: A Multicenter Study."

Scott A. Shapiro, MD, presented "Subarachnoid Hemorrhage" at the Neuroscience Grand Rounds held on December 3, 2014, at the IU Health Neuroscience Center in Indianapolis, Indiana.

In Memoriam

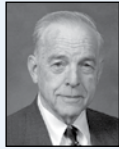

Neale Anthony Moosey, MD, 1939 - 2014

Dr. Neale Anthony Moosey a devoted husband and father, a dedicated and highly skilled doctor, an avid golfer and adoring grandfather to his grandchildren, went to be with his Lord surrounded by his loving family on December 11, 2014 at age 75.

Dr. Moosey was born in LaPorte, Indiana May 27, 1939. He knew at a very young age that he loved the sport of golf and that he wanted to be a doctor when he grew up. His college education began at Indiana University and then he earned his medical degree from the Indiana University School of Medicine.

After a brief medical internship at General Hospital 1965-66, Dr. Moosey entered the Air Force as a captain and served for two years (1966-68). After he was honorably discharged from the Air Force, he completed his residency in Urology at the Indiana University Medical Center 1968-1972. He continued his medical career in Indianapolis for over 40 years. He was a distinguished and well respected urologist who practiced at Community Hospitals.

Dr. Moosey continued to enjoy his golf game and was known for his short game, but there was nothing he enjoyed more than his family.

Jack Donald Summerlin, MD, 1926 - 2014

Dr. Jack D. Summerlin, 88, Indianapolis, passed away on December 17, 2014. He was born January 27, 1926 in Graycourt, South Carolina.

Dr. Summerlin was a Second Lieutenant in the US Navy during WWII.

He received his undergraduate degree from the University of North Carolina and later graduated from Louisiana State University School of Medicine.

He served his internship in the Panama Canal Zone, his residency at IU Medical Center and later taught Otolaryngology at the IU Medical School in the 1960's. Dr. Summerlin then went into private practice as an Ear, Nose & Throat specialist. He was also a Head and Neck surgeon. He did his practice primarily at Winona Hospital, but also at Community North and Methodist Hospitals.

In 2001, Dr. Summerlin was recognized by the IMS as a member of the 50-Year Club. He finally retired in 2008. Among his accomplishments, he held a private pilot license. He volunteered and was on the advisory board at the Indiana School for the Deaf.

Robert Ernest Rogers, MD, 1928 - 2014

Robert Ernest Rogers, MD, 86, Seattle, Washington, passed away on December 1, 2014, from a yearlong battle with ALS.

Dr. Rogers was born in West Palm Beach, Florida on November 16, 1928. He graduated from Stetson University in 1949 and received his medical degree from the University of Miami in 1957.

Dr. Rogers joined the Army in 1950 and retired in 1974 at the rank of Colonel. He served his internships, residencies and Fellowship at Army posts throughout the United States. He served as Chief of OB/GYN at his posts in Korea, Virginia, Honolulu, Walter Reed in Washington DC, and Madigan in Tacoma, Washington. After retiring from the Army, he joined the faculty at Indiana University School of Medicine in Indianapolis where he taught and practiced for 20 years. He was loved and respected by his patients, nurses and fellow physicians.

In 2007, Dr. Rogers was welcomed by the IMS as a member of the 50-Year Club.

John Norman Pittman, MD, 1933 - 2014

John Norman Pittman, MD. A pioneer in open heart surgery, was once described as "one of the good guys in a white cowboy hat." He was a visionary. He believed that hard work could overcome any obstacle. He could do what others thought impossible. He believed in the underdog because he once was the underdog. Dr. Pittman, 81, Carmel, Indiana peacefully passed away on Christmas Day, 2014. He was born on

February 4, 1933 in Princeton, Indiana. Dr. Pittman graduated from Indiana School of Medicine in 1957, serving as Class President. He was a Captain in the U.S. Army Medical Corps at Tripler General Hospital in Honolulu, Hawaii 1957-1958. He trained in General Surgery Residency at Methodist Hospital from 1960-1963 followed by Thoracic and Cardiovascular Surgery Residency at the University of Michigan 1963-1965. He was a Co-Founder and Cardiovascular Surgeon of Cardiovascular Surgical Services founded in 1965 at Methodist Hospital in Indianapolis.

Dr. Pittman along with Dr. Harry Siderys pioneered the development of new cardiovascular surgical techniques in Indiana. Dr. Pittman dedicated his career to the highest quality of patient care, resident education and innovation in a rapidly developing field of Cardiovascular Surgery. He was on the team that performed the first open heart procedure in 1965 at Methodist Hospital which rapidly evolved into one of the busiest programs in the country by 1971. Dr. Pittman developed a new sternal retractor system for use in coronary artery bypass graft surgery and later the first group in the state to perform heart transplantation in 1982. He retired in 1999. Dr. Pittman has received several awards for his distinguished career including J. O. Ritchey Society Award and the Sagamore of the Wabash Award. His commitments to medicine and his community are numerous with several appointments at both Methodist Hospital and IU School of Medicine. He was a member of the IMS 50-Year Club.

IMS

Communication *saves lives.*
Just ask Dr. Singh.

When Pamela felt a flutter in her chest and feared she might faint, she went straight to the ER. Emergency physician Dr. Singh discovered a suspicious finding on Pamela's EKG, and sent an image of the recording to the on-call cardiologist via DocbookMD. The cardiologist quickly confirmed SVT, a condition requiring immediate medical intervention. The potentially life-threatening episode was resolved within minutes—rather than hours—and Pamela was safely discharged home. All thanks to some quick thinking and the secure mobile app, DocbookMD.

*DocbookMD is helping physicians like Dr. Singh communicate more efficiently when it really counts, and is available **FREE** to all IMS members. Learn more at docbookmd.com.*
