President’s Page  Mary Ian McAteer, MD

“I have a special request from each of you reading this.”

The Indiana State Medical Association annual convention provides an opportunity for physicians to come together to discuss problems, and better yet, formulate solutions. By defining our pressing needs, we can direct lobbying activities in the state legislature and inform policy leaders of needed changes to help us professionally and our patients holistically.

ISMA and county societies exist for members. Traditionally members have been able to fully participate in advocacy within our state through county society activity. The ISMA, in the past, has encouraged county society work, evidenced in the bylaws studied by the Future Directions Task Force. One of the resolutions proposed this year, Resolution 18-24 is a result of the task force which states that its goal is to protect the vitality of ISMA by eliminating barriers to membership.

I have a special request from each of you reading this. Please contact the ISMA prior to September 27, through the website ismanet.org, phone 317-261-2060 or FAX 317-261-20176 to express concerns in opposition to Resolution 18-24.

The resolution will harm county medical societies by placing them in direct competition with ISMA for members. The resolution was considered in 2017. The House of Delegates asked the Board of Trustees to reconsider the relevant portion for study. The board asked the task force to expand its representation of large and small counties within its committee. I was selected to be an additional IMS representative. There was only one meeting held, in May 2018. I asked for materials to bring myself up to date on the issue, but was told I wouldn’t need any. The discussion was lively, but the voting block had been carefully set to assure that this resolution would be proposed as you see it today. With no context provided to the newest members of the task force, this seemed disingenuous to me.

The discussion needs to be conducted with more thought as to strengthen local society relevancy as vital for meeting physicians’ needs. The county societies provide forums for discussions for local issues, networking with community resources, leadership development, and mentorship for participation in the ISMA and AMA. The county society needs ways to fund the infrastructure necessary to get people together, assure accurate collection of minutes and assure adherence to rules and regulations. Hiring knowledgeable people who are able to support physicians is the best way to get these things accomplished, but that requires funding. With all the additional changes outlined in the resolution, we all suffer the ability to attract members and therefore lose our ability to ban together as a statewide voice for physicians.

If the goal is increasing membership and ensuring relevance, then our medical society should be focused upon serving our physicians’ needs at the points that the physician can easily access. This requires increased supportive and reciprocal communication and participation within both local and state societies. There are many other ways to solve this problem and I invite the author and task force participants to dedicate our efforts to finding a better solution.

Special Feature

ISMA Officers, AMA Delegation and Alternates to be Elected at Convention

“To be eligible for ISMA officer or AMA delegation positions, a candidate must have been an active member of ISMA for the preceding two years.”

It’s not too early to submit a Declaration of Candidacy form declaring your intent to run for ISMA office for 2018-19.

Officers elected each year at the annual House of Delegates include the ISMA president, president-elect, speaker, vice speaker, treasurer and assistant treasurer. Delegates and alternate delegates to the Indiana American Medical Association delegation serve two-year terms and are elected on a staggered basis; two AMA delegates and two AMA alternates will be elected this year. To be eligible for ISMA officer or AMA delegation positions, a candidate must have been an active member of ISMA for the preceding two years.

Last year, the ISMA Executive Committee initiated use of the Declaration of Candidacy form to help staff identify announced candidates for publication in the pre-convention issue of ISMA Reports and the convention program, with the following statement:

All members of ISMA who choose to run for an elected office of ISMA or the Indiana AMA delegation, and who wish for ISMA to help announce their candidacy, must first complete and submit to ISMA a Declaration of Candidacy form. Candidates who have not submitted the form to ISMA will not be announced or administratively supported in any way by ISMA (e.g., listed on the website, help with mailings/e-mailings, etc.).

The Declaration of Candidacy form is available at www.ismanet.org/pdf/convention/CandidacyDeclaration.pdf.

Candidates may declare their intent to run for office any time before elections are held at the ISMA convention.

Physicians Have Become Devalued in Modern Health Care

Anonymous | Kevinmd.com

“So yes, I am angry. But I am secretly optimistic.”

I’m writing this piece because I’m finally at the point that I am truly angry. I am angry at how physicians have become devalued in modern health care. I’m angry at how systems of care have participated in this by replacing physicians with lesser trained mid-level practitioners. I’m angry at how our title “doctor” has been hijacked to allow patients to be misled or, in many cases, deceived.

It wasn’t that long ago that when someone introduced them to you as “doctor” in the clinical setting that you most certainly knew you were seeing a physician. I have a different perspective than many physicians because I was one of these mid-levels. I was a 27-year-old physician assistant working in family medicine back in the late ’90s. But over the next few years, I began to realize that I was lacking in fundamental medical knowledge that made me unsure of myself at times. More frightening was that I didn’t know what I didn’t know. This meant that I often didn’t seek out the expertise of my supervising physicians because I didn’t know I needed to.

Now before I go any further, I’d like to address the term, mid-level provider. Somehow it has developed into what mid-levels would say is now a negative connotation. I specifically remember when it was a victory for the PA profession to be called a mid-level provider because it helped define our knowledge level more appropriately than the word “assistant.” Now, it’s no longer a title the PAs and NPs want, and so they have decided to call themselves advanced practice providers. At the same time, physicians have been demoted to simply “providers,” further confusing the general public and disrupting the true hierarchy. Now — God forbid — I use the word “hierarchy” because we all know it’s going to result in the cliché response about how physicians just need to be team players. We embrace hierarchy in the airlines because we all know it saves lives. Co-pilots don’t fly solo, and mechanics don’t fly as co-pilots simply because they have a working knowledge of the aircraft. It’s a no-brainer; lives would be at risk. In medicine though, we have decided that patient lives are less valuable than air travelers.

Because I was so frustrated with the many gaps in my knowledge, I decided to go to medical school after four years of full-time work as a PA. It was certainly a wake-up call to realize how in depth the material was compared to what I had learned as a PA. There were countless standardized national exams and board exams in addition to coursework that had to be passed in order to advance and ultimately graduate. There were literally thousands of lightbulb moments where I came to finally learn what it was that I didn’t know as a PA. I can safely say that any med school graduate is vastly more prepared to practice medicine on that day than a physician assistant or nurse practitioner who graduates the same day. But the irony is that we turn these mid-levels loose to start practicing basically independently when the medical school graduate must complete another three to seven years on average before being allowed to independently practice in their specialty. Now in 2018, we find a decreasing amount of funding for residency positions for physicians. So there are literally thousands of physicians who find themselves unable to work due to a shortage of training positions. Several states are addressing this problem by creating a new category of licensed physicians who, by virtue of graduating from medical school, will be able to work as graduate physicians supervised by a board certified peer. However, just this last week a bill was introduced for this purpose in Oklahoma that was opposed by the state PA association.

The association claimed that it made no sense to create a new “untested profession” when there were already PAs meant to fill this role. So even from the profession we birthed, we find an attempt to devalue us. This still falls short of the ultimate misleading and dangerous practice by NPs of obtaining online doctorate degrees and introducing themselves as “doctor” in a health care setting.

In a strangely ironic twist, the very systems that love to brag that they hire only board-certified specialty physicians are the same ones that will throw a new mid-level to the wolves and allow them to practice nearly independently. In many cases, patients never realize they aren’t seeing an actual physician. This is a pure game of deception and goes to the root of why we need legislation that requires that patients be given a choice and know exactly who is caring for them. I wish I had a dollar for every time I have heard a PA explain to someone that they learned the same information as a 27-year-old physician assistant working in family medicine back in the late ’90s. But over the next few years, I began to realize that I was lacking in fundamental medical knowledge that made me unsure of myself at times. More frightening though was that I didn’t know what I didn’t know. This meant that I often didn’t seek out the expertise of my supervising physicians because I didn’t know I needed to.

Nowadays, the physician-mid-level relationship is often one that is forced upon both parties due to corporate greed. It’s simply cheaper to hire a PA or an NP and require the physician to “supervise” them and take all liability. It is essentially an unfunded mandate passed down to the physicians in order to keep their jobs. Rarely is time given to properly train or supervise and even less often is compensation involved.

So yes, I am angry. But I am secretly optimistic. I have seen the grassroots movements begin to grow from other angry physicians who feel devalued. The reality is that the administrators that participated in the hijacking of medicine really don’t have any way to earn a living if the physicians of the country decide to unite and stand up for themselves. I’ve even heard the call to unionize. Luckily, there are still systems that value the physician. In the end, these will be the systems that will survive when physicians find their voice.

Board Discusses District, County Society Resolutions; Questions on Dues Increase Resolution Answered

“The Board expects to make a final decision on implementing this resolve at its September 2018 meeting and will be communicating its plans to all members.”

Last year at convention, the ISMA Future Directions Task Force (Task Force) introduced Resolution 17-22 (Enhance, Grow and Sustain ISMA) and Resolution 17-23 (Membership Dues Adjustment). The Task Force was created in 2014 by ISMA President Heidi Dunnway, MD, to eliminate barriers to membership and protect the vitality of ISMA.

Resolution 17-23 was introduced after the Task Force found ISMA had the third-lowest dues of all state medical associations in the U.S. and had not raised dues for 25 years. In the same period, the cost of providing services had risen, and ISMA membership had decreased. The 2017 House of Delegates passed Resolution 17-23, with 84.8 percent of registered delegates voting for the dues increase.

Three of the resolves in Resolution 17-22 proposed changes to the structure of ISMA. The House of Delegates referred two of the resolves to the Board of Trustees (Board) for study and passed the third proposal, to dissolve the current district medical societies and make them part of ISMA rather than separate legal entities (effective in 2019).

Since last year’s convention, the Board has met and considered these resolutions and how to implement them. Read further for details and answers to questions members may have about these resolutions.

Resolution 17-22: Enhance, Grow and Sustain ISMA

Resolves referred for study: County medical societies; delegates

Resolve 1: Resolve 1 proposed to eliminate (effective 2019) the requirement that a physician be a member of a county medical society to be a member of the ISMA, and vice versa. This resolve did not call for eliminating county societies; it called for making county society membership an option instead of a requirement to join the ISMA, and vice versa. The House of Delegates referred Resolve 1 to the Board for study.

Update: The Board subsequently referred Resolve 1 back to the Task Force to continue studying the proposal. In addition, the Board recommended adding more physicians to the Task Force. As a result, several new members were added to the Task Force. On May 5, 2018, the Task Force met and voted to recommend eliminating county membership as a requirement for ISMA membership and vice versa, but it also recommended this change not be implemented until 2022, to give the counties more time to prepare for the change.

Resolve 2: Resolve 2 proposed to amend the ISMA bylaws to state that every ISMA member who pre-registers and attends the annual convention is a delegate. The House of Delegates referred Resolve 2 to the Board for study. The Board subsequently referred Resolve 2 back to the Task Force to continue studying the proposal.

Update: At its May 5 meeting, the Task Force recommended amending the ISMA bylaws to state that, if a county fails to register delegates by a certain date for all spots assigned by the ISMA bylaws, the Trustee in that district, in his or her sole discretion, can fill all open delegate spots with any members from any counties in that district. The Task Force’s goal in making this recommendation is to increase the number of delegates at convention without changing the overall geographical composition of the delegates.

The Task Force presented its recommendations on Resolves 1 and 2 to the Board during the Board’s regularly scheduled meeting on May 20, 2018. The Board voted to support both of the Task Force’s recommendations. The Task Force plans to submit resolutions with its recommendations during the 2018 convention.

Resolve passed by the House: District medical societies

Resolve 3: Resolve 3, passed by the House of Delegates, proposed that ISMA amend its bylaws (effective 2019) to make the current district medical societies part of ISMA and not separate legal entities.

Update: The Board and Executive Committee have been considering how to implement this upcoming change and have obtained input from the executives of the large county societies, who also staff some of the district societies. Also, ISMA President John P. McGoff, MD, is discussing the implementation of this resolve at district meetings. A summary of the Board’s feedback on how to dissolve the districts, which Dr. McGoff is presenting at these meetings, is online at www.ismanet.org/pdf/Resolution17-22TrusteeFeedback.pdf, and members may also submit input at www.ismanet.org/ISMA/Resolution_Comments.aspx. The Board expects to make a final decision on implementing this resolve at its September 2018 meeting and will be communicating its plans to all members.

Resolution 17-23: Membership Dues Adjustment

Passed by the House of Delegates with 84.8 percent of registered delegates in favor

Q. When will the dues increase take effect?
A: The dues increase will take effect for the 2019 membership year. Dues renewals for next year will be billed at the new rate.

Q. How much will my dues increase?
A: The amount of ISMA dues regular members pay will increase to $490 from $385. However, since ISMA districts are becoming a part of ISMA instead of separate legal entities, members will no longer pay district dues. The net increase for ISMA members will range from $75 to $95, depending on their districts.

Special Feature  Continued from p.11

Q. Is there still a discount on dues if all or most physicians in a group practice become ISMA members?
A. Yes. The House of Delegates in 2012 approved a dues discount for practice groups of five or more physicians, based on percentage participation. Now, those same practices will receive the following flat-rate, per-member discounts.

- 100% group participation - $115 discount per member per year
- 90% group participation - $75 discount per member per year
- 80% group participation - $40 discount per member per year
- 75% group participation - $20 discount per member per year

Q. Are small practice groups still eligible for a dues discount?
A. Yes. The House of Delegates determined in 2012 that members in practices with one to four physicians would receive a percentage discount based on the number of physicians for which dues were paid in advance. Now, those same physicians can qualify for individual, flat-rate discounts by paying for multiple years in advance.

- 10-year membership - $115 discount per year
- 5-year membership - $75 discount per year
- 3-year membership - $40 discount per year
- 2-year membership - $20 discount per year

Q. Can discounts on membership dues be combined?
A. No.

Q. What will ISMA do with the additional revenue from the dues increase?
A. The accompanying pie chart illustrates current ISMA expenses, shown as a proportion of annual membership dues. Additional revenue generated through the dues increase will offset annual operating losses and create opportunities for new initiatives consistent with ISMA’s new strategic planning process.

Q. Couldn’t ISMA use financial reserves, instead of a dues increase, to cover shortfalls?
A. Historically, ISMA has relied on reserves to generate operating revenue and cover operating shortfalls. Reducing or eliminating operating shortfalls through this dues increase will allow ISMA to invest in new initiatives and member benefits to further our association’s mission.

Student
Family Medicine
Manan University, Enrolled

In Memoriam

Robert L. Campbell, MD
Robert Louis Campbell, MD died on August 16th 2018 at his home in Zionsville, IN. Upon graduation from West High School, he enlisted in the US Navy and was stationed at Great Lakes Naval Base. Dr. Campbell then entered the Naval V-12 program and enrolled at Baldwin Wallace College where he received his B.S. degree in Chemistry.

After graduating from Ohio State University College of Medicine in 1949, he completed his internship at the US Naval Hospital in Philadelphia. He was on active duty during the Korean War and was stationed at Subic Bay in the Philippines.

Dr. Campbell was in family practice in Columbus, OH before making the decision to become a neurosurgeon. He completed his training in neurological surgery at the Indiana University Medical Center and joined the faculty there in 1957. In 1965, he was appointed the Director of Neurological Surgery and continued in this capacity until 1992. He served on the faculty until 2006 when he retired as professor emeritus. In 1999, the Robert L. Campbell Endowed Professorship in Neurosurgery was established to recognize and honor him for his extraordinary contributions to the Indiana University School of Medicine and the field of neurological surgery and to support resident education and research. He served in many different professional memberships and had been a member of the Indianapolis Medical Society since 1960.

ISMA Resolutions Help You Advocate for Patients

ISMA resolutions, introduced each year during convention at the House of Delegates, help drive ISMA’s public policy and legislative agenda at the Indiana Statehouse. Only ISMA members may submit resolutions, and all resolutions must be submitted before Monday, July 30, 2018.

In addition, 23 ISMA resolutions will expire unless they are submitted for reintroduction by that date. Passed in 2008, they address issues such as peer reviews, underage drinking, and malpractice insurance for physician assistants. A complete list of expiring resolutions is at www.ismanet.org/pdf/convention/SunsetResolutions.pdf.

Examples of resolutions and issues addressed during the 2017 House of Delegates may be found at www.ismanet.org/2017Resolutions.pdf.

It’s also a good idea to check the ISMA Public Policy Manual at www.ismanet.org/PublicPolicy for existing policies on topics a new resolution might reference.
Officers 2017-2018

Mary Ian McAteer ...............................................................President
Susan K. Maisel ..................................................Immediate Past President
Christopher D. Bojrab ....................................... Secretary/Treasurer
Paula A. Hall ................ Elected from President’s Advisory Council
